

Cloud Transformation service

Modernising and optimising your data management, giving you the freedom to work unrestricted with the power of digital transformation for enhanced agility.

about the service

As technology advances, the urgency for businesses to adapt their operational frameworks swiftly and effectively to smoothly adjust to evolving circumstances has been emphasised.

An increasing number of companies are contemplating a permanent transition to the cloud, where seamless collaboration and productive work can be achieved from any global location. Cloud Transformations allow your business the freedom to work unrestricted and employ the power of digital transformation for enhanced business agility. Turning to Cloud Transformation services to streamline your operations and gain a competitive advantage could be one of the best things you could implement for your business.

how it works

Our Cloud Transformation services modernises and optimises your organisation's data management, analytics and security to align with your digital transformation objectives. We will take the time to understand your business goals and assess your current IT infrastructure and design a bespoke Cloud Transformation project based on your organisational goals. Our Cloud Transformation service will find the right migration-based model not only to move your data, but to help you transform the way you do business. We will help you store data securely and access it from anywhere in the world in a cost-effective way, allowing your businesses to reduce your IT expenses through lower hardware and maintenance costs. Our cloud experts will put measures in place to safeguard your systems and data after the transformation project is completed, helping your business stay ahead of the curve, adapting to the ever-evolving landscape of your industry.

key benefits

Efficiency

Our Cloud Transformation services improve your organisation's access to data enabling collaboration and communication in real-time whilst freeing your IT personnel from routine infrastructure maintenance.

Adaptability

Utilising our Cloud Transformation Service will help you to remain competitive, as it allows for quick scaling and upgrades of your IT infrastructure.

Security

Cloud Transformation services offers your organisation additional layers of security and backups to protect data from cyber criminals, making it a safer choice than storing data onsite.

Cost Savings

We can help you to scale your resources for your Cloud Transformation as needed so that your costs are reduced, paying only for what you use and reducing IT personnel requirements.

features

Cloud Strategy Development

We will assist you in developing a comprehensive cloud strategy aligned with your business objectives. This includes assessing your current IT infrastructure, identifying suitable cloud solutions, and outlining a roadmap for migration and transformation.

Application Modernisation

Our team will help to modernise legacy applications for cloud compatibility, enabling your organisation to achieve greater agility, scalability, and cost-efficiency in the cloud environment.

Infrastructure Optimisation

We will optimise your cloud infrastructure to improve performance, reliability, and cost-effectiveness. This may involve rightsizing compute and storage resources, implementing auto-scaling and load balancing mechanisms, whilst optimising networking configurations.

Data Management and Analytics

Our cloud experts will assist you in migrating and managing data in the cloud, ensuring security, compliance, and accessibility. We will leverage advanced analytics capabilities to derive actionable insights from data, enabling data-driven decision-making and innovation.

Cloud Governance and Security

Our Cloud Transformation Service establishes governance frameworks and security controls to ensure the secure and compliant operation of cloud environments. This includes defining policies, roles, and responsibilities, implementing access controls and encryption mechanisms, and conducting regular audits and compliance assessments.

why you need it

- You are looking to adapt your operational framework to match the growing technological landscape.
- You want to stay ahead of the competition and streamline your operations.
- You're looking for a digital transformation and have no idea where to start.
- You want to modernise and optimise your organisation's data management, analytics and security.
- You're wanting to transform the way you do business, not just move your data to the Cloud.

other useful services

Microsoft Azure Services

Helping you grow with greater efficiency and responsiveness to change including readiness assessment, design, implementation, support, site recovery, back up, app testing and more.

Microsoft SharePoint Services

Providing secure access to internal sites, documents and other info allowing you to share and collaborate more easily with clients, colleagues and partners.

Microsoft Teams Phone Services

Providing you with a versatile seamless collaborative hub to bridge the gap between your remote teams and office-based teams and all stakeholders.
