

Internet Connectivity & WAN service

Giving you a reliable WAN (wide area network) that can handle vast amounts of data transfers with optimum connection security.

about the service

Internet connectivity plays a crucial role in the growth and success of businesses of all sizes. With cloud-based services becoming the new norm, it's crucial for companies to have a reliable and secure WAN (wide-area network) that can handle the vast amounts of data being transferred across various locations. However, securing the right connectivity can be a daunting task for many businesses. This process involves assessing requirements, negotiating service level agreements (SLAs), and dealing with multiple vendors - all of which can be time-consuming and frustrating. With the right strategy and partner, businesses can reap the benefits of a powerful WAN that enables them to respond quickly to customer requests, improve productivity, and enhance flexibility.

how it works

Our Internet connectivity and WAN services start by assessing the your needs so that we can design a tailored network solution for you. We will procure and deploy necessary equipment and services whilst testing your performance and security. Our team will also monitor and manage your network so that we can provide you with scalable support. We will work closely with you to understand your requirements and implement the appropriate technologies, to ensure reliable and efficient connectivity between the your organisation's locations and the broader Internet. Our Internet Connectivity & WAN service also includes ongoing monitoring, management, and support to help you maintain network performance, address issues promptly, and accommodate your organisation's evolving needs, ultimately enabling you to achieve your business objectives with confidence.

key benefits

Increased flexibility

Our Internet Connectivity & WAN service empowers your organisation to seamlessly integrate new components, cloud services, and connectivity options across various sites. By separating data transmission over a network, it becomes faster and easier to update rules throughout your entire WAN infrastructure.

Higher efficiency

Our team of experts can help you optimise cost, by considering the various connectivity types available. By analysing the data types being transmitted across your network, we can help determine the most suitable connection type.

Higher availability

In the past, businesses only had one expensive connection to a Wide Area Network (WAN). With the use of our service, you can prioritise your traffic and automatically switch to a different connection if the primary one becomes unavailable or overloaded.

Better control

Our service allows you to enhance productivity by classifying different applications and traffic types. With this capability, you can determine how data should be prioritised and delivered to its destination

features

Connectivity

Our Internet connectivity and WAN service ensures you are always able to provide internet connectivity to your remote offices, data centres or employees.

Collaboration

Utilising our Internet Connectivity & WAN service allows you to create seamless communication and collaboration between your employees including video conferencing and other methods of real-time communication giving your organisation increased productivity and efficiency.

Remote Access

Using our service, we help you to open up remote access to your company's resources, such as servers, software and databases allowing your teams to work anywhere, anytime.

Control

Our experts help you to maintain visibility and control of your traffic and applications being used across the WAN when you are implementing our services.

why you need it

- You are looking for a reliable and secure connectivity solution that can handle vast amounts of data transfers to any location.
- You need to ensure you are up to date with the latest connectivity solution to help your business growth.
- You want to ensure you have the right connectivity for your organisation.
- You are looking for the right partner to create the correct connectivity strategy for your business.
- You are looking for a connectivity solution that allows your employees to respond more quickly to requests whilst improving your productivity and flexibility.

other useful services

Microsoft Azure Services

Helping you grow with greater efficiency and responsiveness to change including readiness assessment, design, implementation, support, site recovery, back up, app testing and more.

Microsoft Teams Phone Services

Providing you with a versatile seamless collaborative hub to bridge the gap between your remote teams and office-based teams and all stakeholders.

Cloud Consulting Services

Deploying the expertise of our Cloud Consultants to create, manage and optimise an ideal cloud environment for you, starting with a straightforward Cloud Assessment.
