

Microsoft 365 service

The ideal first step to Cloud computing bringing together all the familiar Microsoft Office applications in a way that is easy to use and accessible anywhere.

about the service

Currently, many companies are stress-testing their IT environments due to increasing cost pressures, a higher demand for process flexibility, and heightened security requirements. For most companies, the question is no longer whether to use cloud solutions or not, but rather how quickly and to what extent they can gain experience with these technologies to leverage their benefits. The adoption of cloud solutions provides a flexible and cost-effective approach, and Microsoft 365, offered by one of the world's leading cloud solution providers, is a recommended choice for starters. Microsoft 365 comprises a wide range of services, each designed to address individual tasks in the modern workplace. These services can be easily integrated and combined as needed, for example, it combines various cloud services and proven applications to support communication, collaboration, and business productivity within companies.

how it works

Our Microsoft 365 service is the ideal first step on the path to Cloud computing bringing together all the familiar Microsoft Office applications in an accessible way that is easy to use anywhere. We'll first help you to establish a solid business case for your migration, providing you with our full range of Cloud IT services, from consultancy and assessment to bespoke cloud implementation projects. We will then help you plan and implement, giving you the ongoing business benefits that Cloud technology can provide. Our Microsoft 365 service allows your teams to work together in any location easily with access to emails, web conferencing, documents, and calendars with full business-class security. As this is a lifecycle approach for your organisation, our team of experts will help you to maximise the potential of the latest technology, whilst simultaneously minimising disruption to your organisation.

key benefits

Access

Microsoft 365 enables you to access your applications in any location at any time across multiple devices so your teams can work efficiently increasing your productivity, whilst our experts look after your background updates to ensure you have access to the latest versions of the products.

Seamless

Collaboration becomes much more easy with our Microsoft 365 service; our experts ensure your organisation can seamlessly share documents, calendars, communication and more with minimal disruption to your organisation's IT infrastructure.

Cost savings

With our Microsoft 365 service you won't get hidden costs as the service runs on a simple and flexible subscription fee with individual licensing therefore you only pay for what you require.

Simplicity

The most beneficial part of using our Microsoft 365 service is that there is no longer a need for you to heavily maintain and operate your IT infrastructure as Microsoft uses their own data centres to look after this for you.

features
