Cloud Services

Microsoft SharePoint Online service

Providing secure access to internal sites, documents and other info allowing you to share and collaborate more easily with clients, colleagues and partners.

about the service

SharePoint Online helps organisations share and collaborate with colleagues, partners and clients by providing secure access to internal sites, documents and other information. The system offers you user-friendly and customisable features that allow your businesses to create and manage your own websites, intranet portals, and online document libraries. With its cloud-based technology, users can easily access and share files from anywhere, at any time, whilst also offering advanced security and compliance measures to ensure all data is protected and aligned with industry regulations. SharePoint Online is beneficial for any size business in any industry to seamlessly collaborate and organise within your company.

how it works

We understand that implementing SharePoint is no small feat, which is why we provide comprehensive SharePoint end-to-end consulting services. We can help you with everything from migration, development, implementation, training, and ongoing support. Our team of experts is dedicated to helping your organisation leverage SharePoint to its fullest potential, with solutions tailored to your unique business needs. We will start by analysing your business and objectives so that we can ensure we work with you to satisfy your unique case. We will use our analysis to help you choose the features of SharePoint you need on-premise or online so that we can ensure we're implementing the solutions you need. We're committed to working closely with you every step of the way so that your SharePoint implementation will be a seamless and hassle-free process.

key benefits

Deployment

Our expert teams will use their SharePoint implementation consultations to ensure you get the maximum benefit from the productivity and efficiency SharePoint brings.

Bespoke

We create a tailored plan based on our analysis of your business for migrating your content to SharePoint to avoid any disruption to your business.

Integration

We can provide you with a specialised solution to develop a customised SharePoint based on your business operations including building or modifying solutions.

Expertise

Our SharePoint consultation services including helping you upskill your employees with any training or support directly related to your tailored implemented SharePoint solution.

End-to-End

Our team can provide ongoing support with our 24/7 service desk based on your support plan whether it's quick fix or long term support.

features

Collaboration
We can help provide you a central hub for your teams and co-workers to work in collaboration such as working on documents in real-time no matter where their location is.

Access
Our team will implement solutions that will help you to ensure that you are securely connected from any device to ensure remote working is as flexible as possible.

Document Management
SharePoint is a popular solution for document management including features such as task lists, workflows and more. Our experts will ensure migration is seamless to give you an advanced document management solution.

Security
Our SharePoint consultants will analyse your current compliance in your organisation and ensure government policies are enforced so that you are fully compliant and can continually manage and monitor any risks.

Content Control
A key feature we can offer you as part of our service is a versioning feature which allows you to store, track and restore files whenever they are changed. This will enable you to control content and make revisiting past work simple.

why you need it

- You are looking for a flexible and collaborative tool for your organisation that is tailored to your business and goals.

- You're looking for a centralised hub to access documents, manage files and tasks, networks and colleagues, business information and more which can be managed centrally.

- You want a solution that can integrate your shared work environments to save costs and time in terms of organisation and management across various platforms.

- You want to make this change bespoke to your organisation so that you get the correct engagement and productivity rates from your teams.

- You are looking to ensure your organisation is fully compliant and secure aligned with industry standards when sharing data.
