

Microsoft Teams Voice service

Providing you with a versatile seamless collaborative hub to bridge the gap between your remote teams and office-based teams and all stakeholders.

about the service

With hybrid working on the rise, companies are embracing new ways to accommodate geographically distributed teams. Offices are downsizing and hot-desk systems are becoming the norm. To ensure seamless collaboration, businesses need a solution that bridges the gap between remote workers and office-based staff. Microsoft Teams Rooms provides a versatile and user-friendly platform, transforming meeting spaces of all sizes into collaborative hubs. From small huddle areas to large conference rooms, this solution offers a rich Microsoft Teams experience that is easy to implement and manage.

how it works

Aztech offer implementation, migration, security, and development services for all aspects of Microsoft Teams. Our services include strategy planning, requirements gathering, design, custom development, technical implementation, security configuration, training, and support. We will undertake an initial scoping during a discovery call with you to determine and agree with you your clear objectives and outcomes for the project. Our services are based on the agile and flexible delivery principles around the scope to be delivered and your desired outcomes.

key benefits

Inclusive and Interactive

Our Microsoft teams service will help you to foster inclusive and interactive meetings for everyone, regardless of where they are located with high quality audio and video, inclusive video layouts, wireless content sharing, intelligent speakers, companion devices and collaborative whiteboarding.

Flexible

Utilising our Microsoft Teams service will turn any shared space into a Teams Room which can be accessed through a wide selection of devices including both Windows and Android. You will have access to features which can be scaled to any room size allowing you to connect to any other teams device.

Simplicity

Our Microsoft Teams service allows you to deliver consistent Teams experiences designed to make collaboration easy within your organisation and hassle free due to the inclusion of Microsoft calendar integrations, one-touch join, proximity join, Cortana voice assistance and room remote.

Secured and Managed

Our experts will help you to keep devices protected and up to date with rich management capabilities and powerful analytics using Microsoft teams such as managed Teams Rooms with teams admin centre or AI-driven managed services for Teams Rooms.

features

Planning & Design

When you opt to employ our Microsoft Teams service, we will work with you to define and scope your Teams environment, including organising a workshop with all key stakeholders to agree on the configuration for maximum buy-in.

Deployment/Migration

Our Microsoft experts will assist you in a full deployment or migration for Microsoft Teams using their experience and skills that have been accumulated over the years.

Security & Governance

Our Microsoft Teams service allows us to use Microsoft's tools to implementing security and governance capabilities for your Teams environment. We work with you to ensure your security is fully configured with best practices and is aligned to your security policy.

Teams Voice

Our experts can use the service to assist you in giving your employees the virtual calling features they need, backed by the security and reliability of Microsoft Teams, ensuring you stay product, connect reliably, manage centrally and can easily manage cloud phone calls.
