

Microsoft Viva Service

Transform Employee Experience with Microsoft Viva

the challenge

Organisations today face increasing challenges in managing employee engagement, well-being and productivity. Many traditional tools fail to provide the integration and functionality needed to support modern workforce expectations.

Without a unified platform, businesses are left managing siloed systems, inefficient workflows and insufficient insights into employee engagement, ultimately hindering overall success.

key business outcomes:

Improved Employee Engagement: Create a culture of connection and purpose with tools that align individual goals to organisational priorities.

Enhanced Productivity: Equip employees with intuitive tools to access resources, collaborate effectively, and work smarter.

Streamlined Learning and Development: Provide personalised learning pathways integrated directly into workflows.

Informed Decision-Making: Leverage data-driven insights to optimise work habits and foster well-being.

why choose us?

Trusted Expertise: Extensive experience in deploying Microsoft Viva and other digital transformation solutions.

Proven Results: We have helped businesses improve employee engagement, productivity and collaboration.

Tailored Approach: Customise Viva's capabilities to suit your unique organisational goals.

"If you're looking for IT Support, you need a company that listens to its customers and provides solutions it needs rather than solutions it believes you may want – we have found Aztech do that."

Alan Clarke, Financial Director (MiniClipper Logistics)

service overview

Aztech IT's Microsoft Viva Service offers a robust Employee Experience Platform (EXP) seamlessly integrated into your existing Microsoft 365 environment. Designed to foster engagement, well-being, learning and collaboration, Microsoft Viva provides tools to align strategic goals, empower employees and improve productivity.

Viva Goals: Define and track clear objectives and key results (OKRs) to ensure alignment across all levels of the organisation.

Viva Connections: Centralise access to company news, policies and resources through a personalised intranet-like experience within Microsoft Teams.

Viva Learning: Integrate learning resources from multiple providers, enabling employees to upskill directly within their workflows.

Viva Topics: Use AI to organise business data into easily accessible knowledge topics, reducing information overload.

Viva Insights: Gain actionable insights into work patterns and well-being through advanced analytics and AI-driven recommendations.

example use cases

Enhance employee engagement: Use Viva Connections to keep employees informed and connected with company news and updates.

Streamline knowledge sharing: Leverage Viva Topics to organise and surface key information across your organisation.

Support well-being initiatives: Utilise Viva Insights to monitor work patterns and recommend actions to reduce burnout and improve work-life.

how it works:

discovery workshops:

Collaborate with stakeholders to assess your current employee experience and identify key challenges and goals.

customisation:

Configure Microsoft Viva modules to align with your business objectives and workflows.

implementation:

Deploy Viva across your organisation with minimal disruption, supported by our expert team.

training and adoption:

Provide hands-on training to ensure employees can fully utilise Viva's features.

continuous optimisation:

Monitor and refine the platform's usage to ensure ongoing alignment with organisational needs.
